Texas Instruments

An Innovation Leader with a long history!

Driving innovation for over 85 years.

Nobel Price in Physics, awarded 2000

1930s Revolutionizes oil exploration by measuring

1950s Invents the integrated

Circuit

1970s

Applies signal processing to consumer **Products**

1990s

Creates first apps processor for multi-media cell phones

2010s

Introduced Kilby Labs Innovation Center

1940s

Applies signal measurement to magnetic anomaly detection

1960s

Invents the handheld calculator

1980s

Introduces single-chip digital signal processor

2000s

Focus on innovation in Analog & Embedded Processing
